

Network configuration V1.2

It is required to use IPv4 for the system. The following is the minimum port configuration required for the emergency call system:

Inbound Network
No configuration required

Outbound Network	
Port	Description
TCP/UDP 443	Secure communication (VPN, API, HTTPS)
UDP 500, 4500	IPSec
UDP 3478–3479	STUN/TURN (NAT traversal)
UDP 5000–5005	RTP/RTCP (standard media ports)
UDP 10000–60000	RTP (audio/video streams and real-time traffic)
TCP/UDP 5060–5061	SIP (VoIP signaling)
UDP 123	NTP (time synchronization)
TCP/UDP 8888 / 5201	SpeedTest (bandwidth/performance testing)
TCP 853	DNS over TLS (secure DNS)
TCP/UDP 53	Standard DNS
ICMP	Ping, Echo Request/Reply, network diagnostics

It is recommended to reserve an IP address for the Vidatech router. The corresponding MAC address is indicated directly on the device.
